

Jay Herrera

Software Engineer

With over four years of experience managing the engineering department of a software company, I have a proven track record of architecting innovative solutions and leading high-performing teams. I excel in creating and maintaining complex (yet, organized) environments, leveraging my strong technical skills and strategic mindset.

My ability to think creatively allows me to identify and solve even the most challenging problems, driving continuous improvement and efficiency gains. As a dedicated leader, I foster collaboration and empower my team to achieve their full potential, while employing humility in respecting the chain of command. I am passionate about delivering tangible results and am eager to leverage my expertise to drive success in a new role.

Employment History

Head of Engineering at Glowstik, Denver

OCTOBER 2020 – PRESENT

- Scaffolded large projects with thousands of files in an organized fashion
